No. REC/PMD/AMISP/2022-23/270

Date: 28.09.2022

Subject: Addendum of option for usage of SMC meter boxes and guidance on inclusion of additional scope of Smart System Metering in non-contiguous areas – in the latest version of AMI Service Provider (AMISP) SBD

Sir / Ma'am,

This is in continuation to the last version of SBD for appointment of AMISP under RDSS, issued vide our letter ref REC/RDSS/2021-22/236 dtd. 20th August, 2022.

Subsequently, REC has been in receipt of a number of inputs and suggestions from DISCOMs and Industry Stakeholders for addressal of a few additional provisions in the SBD.

Accordingly, Annexure-I is enclosed herewith, highlighting the addendum to the SBD, for providing the option for usage of SMC meter boxes along-with the guidance on inclusion of additional scope of Smart System Metering in non-contiguous areas (*in case the DISCOM opts to undertake these works under the same RFP, along-with the works in contiguous areas*). The same is also uploaded on REC website (<http://recindia.nic.in/SBD-AMISP>).

This for your kind information and necessary action please.

With regards,

Yours Sincerely,

(R. Lakshmanan) 28.9.22.

A. Addendum to SBD - Inclusion of additional option of SMC meter boxes:

Annexure O under Section 6 of the SBD mentions that the meter boxes of 1-Ph and 3-Ph consumer meters to be of polycarbonate material. In respect of the 1-Ph and 3-Ph consumer meters, wherever the SBD mentions the type of meter boxes to be installed, the same shall include the option of using SMC meter boxes as well and the appropriate choice may be made by the DISCOMs based on their assessment and contextual requirements.

B. Guidance note for inclusion of additional scope of smart system metering (DTs/ Feeders) in balance areas (non-Phase-I areas), from the areas proposed for the end-to-end smart metering RFP (SBD) for appointment of Advanced Metering Infrastructure (AMI) Service Provider in Phase-I contiguous electrical locations – in case the DISCOM opts to undertake both these works under the same RFP

In reference to the Guidance circulated to Discoms vide letter no. REC/RDSS/22-23/204 dated 11th July 2022, point 2 (iii) stated that Utilities may also choose to include additional scope of smart metering of remaining DTs/ Feeders in the AMISP tenders to be rolled out for smart prepaid metering of Phase-I consumers. This would help utilities streamline the implementation schedule as well as help them expedite the smart meter deployment of 100% DTs and Feeders of Phase-II areas in-line with their REF and RDSS scheme guidelines.

If the utility decides to leverage the above-mentioned option, following changes may be required in the Model Standard Bidding Document (SBD) released for appointment of Advanced Metering Infrastructure (“AMI”) Service Provider (“AMISP”) for Smart Prepaid Metering in India on Design Build Finance Own Operate Transfer (DBFOOT) basis (*<Key changes are highlighted in red for easy reference>*):

4. Section 6 Clause 4 of the SBD:

“4. Consumer Indexing

Consumer indexing will be carried out/verified for the incoming population of smart meters for end-to-end metering at contiguous electrical locations in the selected AMI Project Area *and for dispersed metering of DTs/ Feeders at non-contiguous electrical locations in the selected AMI Project Area*. For this a door-to-door survey shall be required for each meter installed and tallying it with the consumer related records (physical, electrical and commercial) available with the Utility. In establishing the linkage of the consumer meter to the electric network, the asset (including the meter) codification as used by the utility GIS (or as per standards set by the utility) shall be strictly followed. If the GIS asset database is available, the verified consumer data shall be uploaded into the GIS database by the Utility for a single point of truth, presentation and secondary evaluation. If GIS is not available, then the AMISP is required to create a standalone consumer indexing database. This database of electrical indexing shall have the following broad parameters:

...”

5. Section 6 Clause 6 of the SBD: Following clause shall be included in Clause 6.2.2 (*below the table on list of reports*):

“These reports shall be generated for both contiguous as well as non-contiguous electrical locations. However, for non-contiguous electrical locations as mentioned in Clause 1.2 (C), all relevant reports shall be generated as per scope except for those that are not technically feasible for example, consumer related reports like revenue analytics, load recording of consumers etc.”

6. Section 6 Clause 9.4 of the SBD: A new table on minimum performance tests to be carried out as part of the Site Acceptance test (SAT) for Non-contiguous electrical locations as mentioned in Clause 1.2 (C) shall be added below the existing use cases table:

“9. Tests, Inspections and Management of the Quality Assurance / Quality Control Program”
